PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Architect and B.Tech Computer Science student (2023-2027) specializing in building high-fidelity **Local-First AI ecosystems**. Expert in **RAG pipelines**, **Vector Databases**, and **Logistics ERP systems**. Proven track record of shipping **15+ production-grade applications** with a focus on **low-latency performance** and **high-availability architecture**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), C++, Java, Python, SQL, Go

Frameworks & Web: Next.js, React, Node.js, TailwindCSS, Prisma ORM, Rest APIs

AI & Databases: RAG, Vector Retrieval, Llama-3.1, Groq, Pinecone, Supabase, PostgreSQL

Core CS & Tools: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Docker, Git, Vercel, Web Audio API

PROFESSIONAL & PROJECT EXPERIENCE

Lead R&D Architect / Full-Stack Engineer | Lexora AI PRO (Document Intelligence)

- Architected a premium RAG environment optimized for **document intelligence**, processing complex **whitepapers and automated data extraction**.
- Engineered a **zero-dependency** vector retrieval pipeline that achieved a **sub-200ms query latency** for production data chunks.
- Implemented **hashed embeddings** and a **custom local vector index** to minimize infrastructure compute costs while boosting throughput.

Full-Stack Developer | SarthiSync TMS (Logistics Operation System)

- Digitalized complex logistics workflows by building an **AI Dispatch Copilot**, resulting in a **60% reduction** in administrative overhead.
- Engineered secure **dual-OTP verification** and **ePOD (Electronic Proof of Delivery)** capture to establish **100% audit-ready** transactional compliance.
- Developed mission-critical operational dashboards handling **live fleet tracking data** with robust automated observability.

AI Engineering Specialist | Rahi.AI (AI Travel Orchestrator)

- Developed a high-performance travel platform featuring **100% automated** day-wise itinerary generation customized via **AI personalization**.
- Integrated **Stripe billing** infrastructure for secure e-commerce monetization alongside **Edge Permission Authentication** for secure access control.
- Built **real-time multi-user collaboration** layers using state synchronization to allow simultaneous travel planning across active clients.

Frontend Engineer | JS Arcade 2.0 (Gaming Space)

- Engineered a web gallery of **10+ immersive applications** using **100% Vanilla JavaScript**, **custom spatial physics** engines, and the **Canvas API**.
- Optimized rendering pipelines and memory cycles for mobile environments, maintaining a consistent **60 FPS** performance target.

ACHIEVEMENTS & METRICS

- 15+ Production Deployments:** Successfully shipped multiple concepts to production across **Edge and Serverless** environments.
- 98% System Availability:** Maintained high-availability architectures with **robust error handling** and **automated observability**.
- Lead R&D Architect:** Served as the lead architect for **mission-critical logistics** and **AI-driven products**.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2023– 2027 (Expected)

SCRIET, Ch. Charan Singh (CCS) University Campus, Meerut
